

133PB / 133APB Pommel Horse

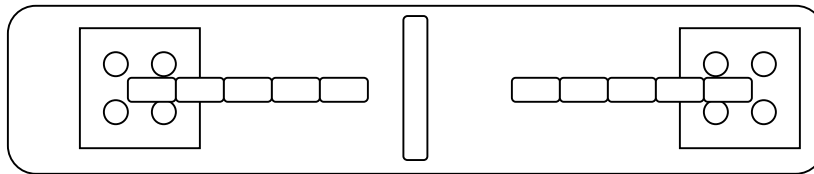

(Important Pre-Assembly Information)

Dear Customer:

The one Height Adjusting Tube of this product has been mounted slightly offset to the configuration it would normally be in when using the product. This has been done to facilitate packing and unpacking from the box.

Configuration

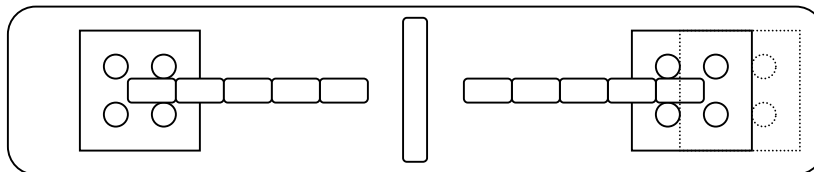

Leg has been moved →
outwards to allow for packing
and removal from box

Before attaching the top to the base, remove the four bolts and slide the mounting plate towards the center (to the left as shown in diagram) so that the four mounting holes in the plate line up with the four holes in the pommel horse body. Secure in place using the four bolts. Ensure that leg is properly secured before use. Adjusting tubes and the “Horse Top” is ready to be mounted onto the base.
